ABOUT THIS SAMPLE

How this list was built.

- Five sites pulled from TCEQ construction stormwater records, each with its own authorization number, each checked ACTIVE on October 30.
- Distances and hauling scope are our read of the public record, not confirmation that work has started or that a hauler is unselected.
- No individual names; every contact is a business name on file.

A stormwater authorization shows a site is permitted for construction; it does not say who hauls for it.
